

Product Line Card

Control & Motion, Inc. provides representation, sales, application expertise, and support services for these top-rated automation component & mechatronic offerings:

Control Techniques – High Performance AC, Servo, & DC Drives

Your single source for AC, DC, Servo & drive systems, 1/3hp to 4,200hp. The Unidrive M is a truly universal drive with unlimited communications options and Motion Made Easy programming. See all Control Techniques drive offerings at www.controltechniques.com.

Trio Motion – High Performance Motion Controls

Powerful, economical, flexible multi-axis motion controllers. Seamless control of 1 to 128 axes of servos, steppers, piezo motors, and/or hydraulics. Complete machine control, I/O expansion, HMI's, multiple communication options, free software. Visit www.triomotion.com.

KB Electronics – Low Cost AC&DC Drives - NEMA & Chassis Mount

Reliable, low cost motor control for AC & DC applications, battery DC to DC controls, brushless DC drives, & Triac fan controls. Affordable NEMA4X and PMAC drive products. 200 stocked models, highly customizable, OEM brand-labeling. www.kbelectronics.com.

Macron Dynamics – Linear Actuators and Multi-Axis Gantry Systems

Robust actuator and gantry systems. Made in the USA. Industry leading 7-day delivery. Custom engineered solutions to meet your exact application requirements. Stroke lengths in excess of 400ft. Speeds to 600 in/sec. Loads to 10,000 lbs. see www.macrodynamics.com.

Mach Motion Products – Cost Effective, Custom, Motion Control Solutions

A complete line of unique motor solutions and customized drive controls for OEM applications. Brushless DC, Slotless DC, Permanent magnet, with or without integrated drives, Gearmotors. Custom OEM / high volume solutions for a wide range of industries. see www.machmo.com

STOBER - Servo Gear Reducers, Geared Servo Motors, Brakes

STOBER offers the broadest, most complete line of gearing & servo gearmotors to fit a wide range of applications. Inline & right-angle hollow shaft are unique in the industry. Gearing with integral brakes & complete geared rack & pinion systems are also available. STOBER's factory in the Southeast insures quick delivery. see www.stober.com

Kyntronics – Linear and Rotary Actuator Solutions

Affordable, rugged, all-in-one electro-hydraulic actuators. Forces to 170,000 lbf thrust (755 kN). 50% more efficient than electro-mechanical actuators. Eliminates the hydraulic infrastructure. Power on demand. Free of leaks, maintenance, and mechanical wear.... see www.kyntronics.com

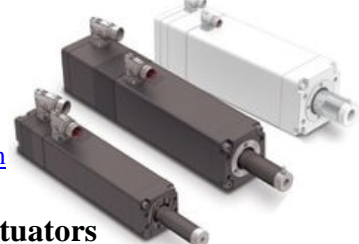

R+W America – Industrial Couplings & Torque Limiters

Industrial couplings from 0.1 Nm to over 2,000,000 Nm. Torque limiters (safety couplings) from 0.1 Nm to 2,800 Nm. Line shaft couplings from 5 Nm to 25,000 Nm. Bellows style, zero backlash elastomer insert, disk pack & gear style couplings.... see www.rw-america.com

Tolomatic – High Force Linear Actuator Solutions

Robust, reliable, planetary roller screw and ball screw actuators. Forces up to 40,000 lbs thrust. Integrated motor/actuator designs. Solid stainless steel and food grade washdown units available. Use with any servo drive. Proudly manufactured in the USA since 1954. ... see www.tolomatic.com

Nanotec – Integrated “Plug & Drive” Smart Motors & Actuators

Integrated motor solutions perfectly matched to your application. Nanotec's product finder at <https://us.nanotec.com/> allows you to form a modular solution from over 100,000 combinations. Integrated motor/drives in rotary or linear actuator configurations, with gearing & brake options.
